

Dear Hiring Manager,

I am writing this to apply for the position of the Digital Skills Trainer at Essex. Me coming from the computer background student I understand the impact of the digital skills which are required for the older people and disable people to understand. The digital world can be a scary place and fruitful if used right and stay aware of the scams over the internet and it's important to share this knowledge to the older generation people and disabled people to help them get going on the digital world and get the full benefits and advantage of the digital world. Your vision on what u do is interesting and really bring change to the society and the world so I would like to be the part of your team and work together to bring out the changes and share this knowledge to the people.

Thank you,

Your's sincerely

Bipul Tamang
